*Drive Innovation and Digital Transformation*

## Technology Platform

A powerful Enterprises **Content Management System**, to capture, store, manage, access, retrieve, annotate, share and synchronize information and documents including Outlook Email Online, efficiently and cost-effectively via reliable and secure platform.

A **Portal** provides a secure and unified access point for integrating information, people and processes which cater for customers, vendors and others beyond an organization's boundaries.

**Business Intelligence** Platform for easy ad-hoc reporting as well as business analytics and diagnosis.

An efficient **Business Process Management** Platform enables digital transformation throughout the business operation and processes.

## Vertical Applications

An efficient and cost-effective **Human Resource Management** Solution, offers unmatched breadth and depth of functionality for workforce management by unifying HR daily operation from recruitment, payroll, training, appraisal, remuneration to employee self-service (ESS), to maximize ROI in talent management.

A system for entire **Procurement** process from job requisition, tender doc preparation, e-tendering, tender reply analysis, vendor selection, job order and letter of award, job completion and payment approval. Also include budget set up and spending control, vendor registration and assessment/review.

Automate the entire **Rental** application and approval processes for both retail and offices, from new application and generate offer letter to renewal, extension, relocation to replacement and termination.
